-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1.

- On page 1, before “BACKGROUND OF THE INVENTION”, insert:

“CROSS REFERENCE TO RELATED DOCUMENT

This application claims priority to Taiwanese Patent Applications No. 092125671, filed on September 17, 2003.”.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-16 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. They fail to have any of the Statutory Categories of: a “machine”, “manufacture” and “composition of matter”, which all define things or products, and a “process”, which defines actions. They are rather a computer language such as AUTOCAD, Pro Router or some forms of programming EDA software. The claims are mere transformation of data in the CAD system without transforming an article or physical object to a different state

or thing.

Claims 1-16 are also rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a specific asserted utility or a well established utility.

The applicants' claimed invention of routing signal traces on two layers and positioning a plurality of vias between the two layers for interconnection, which are the basic multilayer circuit board to be either auto- or manual-routed by PCB layout/design software and the undefined routing of the traces through the Kth, Mth, Rth traces, etc... on each layer, is not supported by a specific asserted utility for the reasons set forth above, credibility cannot be assessed.

Claims 1-16 are further rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a specific asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure.
